Non-Turfgrass Landscapes on U.S. Golf Courses

Results from the Golf Course Environmental Profile's property profile and environmental stewardship of golf courses survey show that non-turfgrass landscapes on U.S. golf courses comprise approximately 358,278 acres or 559 square miles (which is larger than many national parks).

- Mount Rainier National Park (378 square miles)
- Rocky Mountain National Park (415 square miles)
- Everglades National Park (500 square miles)
- Death Valley National Park (550 square miles)

Non-turfgrass landscape acreage (total U.S. acreage – 358,278):
